

Huron River Chain of Lakes Update

June 3, 2019

Treatment: Treatment has started on specific lakes and canals. Please check the Aquatic Services website to see when your lake is scheduled for treatment.

<https://www.aquaticservicesinc.info/schedules>

Meet & Greet Educational Meeting: Please join the Washtenaw County team as we introduce the new Lake Manager, Paul Hausler, from Progressive AE. Paul will provide a status update and other information regarding the Huron River Chain of Lakes invasive aquatic species. We will allow time for questions and answers. This meeting will be on June 17th from 7:00-9:00 PM at Hamburg Township Hall, 10405 Merrill Road, Hamburg, MI 48139. If you are not able to make the event, it will be recorded and available for viewing on the Hamburg Township webpage. If you have any questions please email or call Lauren Koloski at koloskil@washtenaw.org or 734-222-6865. Please spread the word to those who may be interested.

Treatment Maps: You will find the 2019 Treatment Map [here](#). I am continuing to update the website with additional information as I receive it. When calling about areas of concern, we request that you use the GPS waypoint number associated with the location. Doing so enables us to communicate the location of your information when discussing with our contractors. You can email them to koloski@washtenaw.org or call 734-222-6865.

Website Shortcut: To help everyone get to the Washtenaw County Huron River Chain of Lakes website faster we have created a shortcut. You can now plug in www.Washtenaw.org/huroncol into your search bar and it will take you right to the site.

Lake Management Team: Progressive AE recently took over lake consultant services for the Huron River Chain of Lakes. Check out their website here: <https://www.progressiveae.com/expertise/water-resources/>.

Additional Information:

PFAS: The “Do Not Eat” advisory on the Huron River starts when N. Wixom Road crosses in Oakland County and extends downstream to the mouth of the Huron River as it enters Lake Erie in Wayne County. For a full list of water-bodies please visit
