

Huron River Chain of Lakes Update

June 18, 2019

Treatment: Treatment continues to be scheduled. Please check the Aquatic Services website to view the upcoming treatment schedule. <https://www.aquaticservicesinc.info/schedules>

Surveys: Progressive AE will be out on the lakes July 1, 2019 to complete another survey of the Aquatic Plants.

Meet & Greet Educational Meeting: We hosted a Huron River Chain of Lakes update on June 17, 2019 at Hamburg Township Hall. If you were not able to join us please view the recording here.

<https://livestream.com/accounts/11401930>

Thank you to the team at Hamburg Township for having us! It was a great opportunity to meet Paul Hausler from Progressive AE the Senior Scientist for the Chain of Lakes and learn a little bit more about this body of water.

Treatment Maps: You will find the 2019 Treatment Map [here](#). I am continuing to update the website with additional information as I receive it. When calling about areas of concern, we request that you use the GPS waypoint number associated with the location. Doing so enables us to communicate the location of your information when discussing with our contractors. You can email them to koloski@washtenaw.org or call 734-222-6865.

Website Shortcut: To help everyone get to the Washtenaw County Huron River Chain of Lakes website faster we have created a shortcut. You can now plug in www.Washtenaw.org/huroncol into your search bar and it will take you right to the site.

Lake Management Team: Progressive AE recently took over lake consultant services for the Huron River Chain of Lakes. Check out their website here: <https://www.progressiveae.com/expertise/water-resources/>.

Additional Information:

PFAS: The “Do Not Eat” advisory on the Huron River starts when N. Wixom Road crosses in Oakland County and extends downstream to the mouth of the Huron River as it enters Lake Erie in Wayne County. For a full list of water-bodies please visit
