

## City of Ann Arbor Argo & Gallup Canoe Liveries Worm Bins & Recycling River Day Camps & Meeting Room Rentals

The worm bins and recycle bins were purchased in early June so we would have them in the Argo and Gallup River Camp spaces for the summer. The camp kids loved them! The worm bin proved to be a fun way to educate children about composting. The campers also used some of the worms for fishing off the docks. We had approximately 500-summer camp children learn about composting and recycling in 2018.

The Gallup Park Meeting Room is rented throughout the year and we have the worm bin, recycle bin and trash bin set up with signage for all of the meeting room renters to use. We have Driver's Education training for Huron High students held in the Meeting

Room each weekday so the bins will be an informative tool throughout the winter as well. Next spring the 6<sup>th</sup> grade Ann Arbor Public Schools will be using the Gallup Park Livery for their fieldtrips and we will set up the worm and recycle bins for the students to utilize with their picnic lunches.

The worm bin will be a hands-on learning tool to teach the many Gallup Park patrons about habitats and nature's cycles. The worm bin and the recycle bin along with the educational signage will reduce the amount of garbage generated in our programs and facility. Thank you for this grant opportunity.
