

# How to wear a KN95 mask

1

Wash your hands or sanitize if you can. Unfold the mask and flatten the metal nosepiece. Hold the mask under your chin with the nosepiece facing up.

2

Place the straps over each of your ears. Pull the mask on your face with the nosepiece covering your nose.

3

Adjust the nosepiece using fingers from both hands to mold it to the shape of your nose.

4

Adjust fit as necessary. All parts of the mask should be flat against your face with no gaps. You shouldn't feel air leaking out as you breath.

## Other things to know

- Do not wash or sanitize your KN95. With proper care, the mask should be reusable for an extended period of time (depending on use).
- Between uses, store your mask in a safe location where it can't get wet.
- Facial hair can impact your KN95's ability to tightly seal to your face, reducing your protection.
- Throw away and replace your KN95 when it becomes dirty, has stretched out, or has become damaged.
