Total number of confirmed and probable COVID-19 cases over the past 28 days: 3202

Washtenaw County Residents with a confirmed or probable COVID-19 case over the past 28 days: 0.87%

## Washtenaw County Case Rate Map by Zip Code over past 28 days (% of population who have a confirmed or probable COVID-19 case)

### Data Notes

- Data source: Michigan Disease Surveillance System (MDSS).
- Data are provisional. COVID-19 case rates are calculated using cases reported to MDSS and population numbers for each zip code (ESRI Updated Demographics 2019).
- Recent COVID-19 numbers likely underestimate true COVID-19 case rates. COVID-19 cases reported to MDSS are primarily PCR/NAAT and antigen tests from clinics. Most at-home antigen tests and non-clinic tests will not be reported to MDSS.
- Cases among individuals incarcerated in state and federal correctional facilities are not included.
- COVID-19 cases from the 48109 zip code (primarily students in University of Michigan dorms) are not shown on this map. However, these COVID-19 cases are included in the total case count in Washtenaw County over the past 28 days. University of Michigan Ann Arbor campus COVID-19 data can be found [here](#).
- Definitions:
  - COVID-19 cases: confirmed and probable cases of COVID-19 reported to MDSS from August 4, 2022 to August 31, 2022.
  - Confirmed cases: individuals who have been tested and received a positive PCR/NAAT result.
  - Probable cases: individuals may have a positive antigen test. They have been directly linked or in close contact to a confirmed case, have symptoms consistent with COVID-19, and do not have a PCR/NAAT positive result.
