Washtenaw County Case Rate Map by Zip Code since March 2020 (% of population who have had a confirmed or probable COVID-19 case)

Data Notes

- Data source: Michigan Disease Surveillance System (MDSS).
- Data are provisional. COVID-19 case rates are calculated using cases reported to MDSS and population numbers for each zip code (ESRI Updated Demographics 2019).
- Cases among individuals incarcerated in state and federal correctional facilities are not included.
- COVID-19 cases from the 48109 zip code (primarily students in University of Michigan dorms) are not shown on this map. However, these COVID-19 cases are included in the total case count in Washtenaw County over the past 28 days. University of Michigan Ann Arbor campus COVID-19 data can be found [here](#).
- Definitions:
 - COVID-19 cases: confirmed and probable cases of COVID-19 reported to MDSS since March 1, 2020.
 - Confirmed cases: individuals who have been tested and received a positive PCR/NAAT result.
 - Probable cases: individuals may have a positive antigen test. They have been directly linked or in close contact to a confirmed case, have symptoms consistent with COVID-19, and do not have a PCR/NAAT positive result.
