

# New Confirmed COVID-19 Cases in Washtenaw County Residents (by Symptom Onset Week)

2/28/21 - 2/26/22 (second year of COVID-19)

Washtenaw County (N = 46225)

Note: In summer 2021, home antigen tests started to be available, however it took several months for them to be more widely accessible. Some people may have tested positive on a home antigen test without getting a confirmatory PCR test during the time frame of this graph, but that situation would have been more likely in the second half of 2022.

Data source: Michigan Disease Surveillance System (MDSS). Confirmed cases indicates individuals who had a PCR positive lab result for COVID-19. See more COVID-19 data at [www.washtenaw.org/3108/Cases](http://www.washtenaw.org/3108/Cases)
