

New Confirmed and Probable COVID-19 Cases in Washtenaw County Residents (by Symptom Onset Week)

2/27/22 - 2/25/23 (third year of COVID-19)

Washtenaw County (N = 36420)

Data source: Michigan Disease Surveillance System (MDSS). Confirmed cases indicates individuals who had a PCR positive lab result for COVID-19. Probable cases indicates individuals with a positive rapid antigen test conducted in a healthcare setting and no confirmatory testing (PCR or nucleic acid test). A person may also be classified as a probable case if they are a close contact to a case and have symptoms consistent with COVID-19. Individuals with a positive home antigen test who are symptomatic or linked to another positive case would also be a probable case of COVID (note that most home antigen tests are not reported to public health).
