

Healthy Neighborhoods Team

Our team of Health Educators & Community Health Workers can help with:

Family health education

Community Health Educators can assist residents with individual health coaching and education around asthma, diabetes, heart disease, lead poisoning prevention, nutrition, and more.

Social services navigation

Community Health Workers can help individuals and families get connected to services around food, medical and dental care, education, housing and utility assistance. We can also help with getting essential items like clothing and furniture.

Community engagement

Our team is all about connecting with our community. We would love to set up a table at your next event to share resources.

Contact us!

healthyneighborhoods@washtenaw.org / 734-544-6801

The Healthy Neighborhoods Team works to assist low to moderate income people living in Washtenaw County communities that are high on the social vulnerability index. If you have questions about eligibility for services, contact us!
